SUHAIL BUILDING SOLUTIONS

COMPANY PROFILE

Sheikh Khalid Bin Ahmed Bin Mubarak Al Thani

Chairman

‘Qatar has successfully solidified its position as one of the most resilient, diverse, and competitive economies in the region.’

This is in line with the approach set by His Highness the Amir Sheikh Tamim Bin Hamad Al-Thani, to achieve Qatar’s National Vision 2030, which aims to transform Qatar into an advanced country, capable of sustaining its own development and providing a high standard of living for all its people for generations to come.

Qatar has worked on balancing its strategies and plans to promote comprehensive development by embracing integrated economic policies that raise the contribution of the non-hydrocarbon sector to GDP.

Qatar also continues to focus on the energy sector as an important source of national revenue while channeling these revenues into supporting all economic sectors and transforming national industries and trade sectors into active partners in achieving the objectives of its National Development Strategy.

Along these lines, **SUHAIL INDUSTRIAL HOLDING GROUP**, which is considered the first of its kind in the country, has prioritized the development of a favorable business to meet the needs of the country and build a strong production base that will achieve balanced economic growth for Qatar.”

WHO ARE WE?

Suhail building Solution is a leading trading & contracting company established in 2013 in Doha.

We aim to be one of the preferred suppliers and service providers to the rapidly growing construction sector. Our diversified product portfolio allows us to approach and be involved in different projects' nature (infrastructure, civil, commercial, and industrial).

We drive the outcomes that matter most to improve safety and enhance comfort. Our formidable sourcing network has enabled us to undertake specialized client procurement assignments. We have been supplying our products to major projects in the State of Qatar. We offer the most competitive prices in the market without compromising the quality of our products.

Our talented and professional team with expertise in the field of Building Materials is responsible for providing timely service to the varied requirements of our esteemed clients. We excel in providing our customers with the proper construction and building material requirements. Our customers trust and value our product knowledge and industry experience to provide the right solution and advice. We stock nearly 1,000 quality products, all backed by efficient customer service. With a dedicated purchasing team, we source from all over the globe to give our customers the right quality and value they want.

CORE VALUES

- Our values are the cornerstone of our culture.
- We promise honesty and transparency
- We believe in doing well by doing good and hold ourselves accountable to make the world a better place through solutions.
- We win when our customers are satisfied.

OUR VISION

- To be known as a quality, reliable and trustworthy building materials supplier in the region.
- We strive to become one of Qatar's leaders in the building materials, construction chemicals & special construction related machinery sector by providing, delivering and maintaining the highest quality of service while continuously exploring new ways to improve performance and expand our horizons.

OUR MISSION

As a company and individuals, we value Honesty, Trust, Respect, Responsibility, Productivity, Credibility, Flexibility, Excellence, and Improvement.
We strive to provide our customers with the best possible service and hold each other accountable.

- To supply construction chemicals and building materials of high quality, reasonably priced, delivered on time consistently in an environment of friendly, attentive, and efficient people.
- By setting high standards in quality, service, safety, and environment.
- By serving our customers and community with quality products at unmatched prices.
- By providing environment-friendly and innovative building materials and services to the construction industry.

OUR PRINCIPALS & PARTNERS

To enhance our presence and strengthen our position in the market we tied up a long-term business partnership with many class-A manufacturers who cover a wide range of products, machineries & tools. Our diversified product portfolio meets the requirement of construction & finishing contractors, end users and many others.

ISONEM[®]

It is a company aiming at export. It proved its quality in waterproofing in many countries especially the USA, England, Canada, Europe, and Africa. Besides exporting to 100 countries, it formed distributors in 20 countries, opened sales showrooms, and signed its name on many prestigious projects all over the world.

By creating a serious market in the world in 14 years, the success of the brand ISONEM is no accident.

ISONEM developed the production of waterproofing materials needed in its own R&D and presented these products to world markets with a very well trained staff. As well as to quality products, employees in the company played a key role in the success of the brand ISONEM.

PRODUCT SAMPLES

WATERPROOFING PRODUCTS

ISONEM SB SUPER COMPONENT

Description: Special Mineral Filled Waterproofing material.

Packaging : 5Kg, 10Kg & 18Kg

ISONEM MS POLIA

Description: Liquid Polia Polymer

Packaging : 5Kg, 10Kg & 18Kg

ISONEM MS POLYMER

Description: 300% Elasticity, WP Material

Packaging : 5Kg, 10Kg & 18Kg

FLOOR COATINGS

MS FLOOR

Description: Asphalt and Concrete Floor Paint

Packaging : 5Kg, 10Kg & 18Kg

ISONEM M80

Description: Asphalt and Concrete Floor Paint

Packaging : 5Kg, 10Kg & 18Kg

ISONEM LITHIUM HARDENER

Description: Lithium Based Concrete Hardener

Packaging : 5Kg, 10Kg & 20Kg

SPECIAL PAINTS

ISONEM THERMAL PAINT

Description : Heat Insulation Paint

Packaging : 5L, 10L & 18L

ISONEM ANTI SOUND PAINT

Description: Sound Insulation Paint

Packaging : 5L, 10L & 18L

ISONEM ANTI RADIATION PAINT

Description: Electromagnetic Radiation Protection Paint

Packaging : 5Kg & 10Kg

MAIN PRODUCTS & COLOR CHART

With service to more than 30 countries in Europe, the Middle East, and Africa at the highest quality standards of the decorative concrete industry and honored being the choice of experienced contractors, “DBS – Decorative Concrete & Stamped Concrete Specialists” DBS is the licensed manufacturer of Flex C Ment Decorative System since 2003.

Color Hardener: is ready to use dry shake product. This product is formulated to be easily integrated into the surface of freshly placed concrete. Color Hardener densifies the surface of the slab, increases its resistance to wear, freeze and thaw cycles, heavy traffic and enhances light reflection while greatly improving appearance.

Color Hardener is also used in institutional, industrial, commercial, and residential applications for interior flat concrete floors where workhorse, abrasion resistance, colored or light reflecting floor is desired.

Color Hardener is formulated with specially graded silica quartz aggregates, top-quality Cement blends, lightfast synthetic and natural iron oxides, for non-fading and U/V light resistance, and proprietary additives.

Powder Release Agents: these are used as bond breakers when stamping and stenciling concrete. Whatever you are using pattern stamping mats, texturing skins texture roller agents prevent the urethane mats and texture rollers from sticking to the concrete.

Powder release agents are dusted over freshly place concrete just before the initial stamping process is to begin. It will not only act as a bond breaker for the stamps, but once the excess powder is washed off the following day, it will add a second coloring effect to the textured surface.

It is applied to unsealed, hardened, and stamped concrete surfaces to impart a secondary color to the surface visually enhancing its pattern and/or texture.

CS Coating Industry has more than 20 years of experience in the production of epoxy resin and residential, commercial, and industrial floor coatings. Our products include Clear Epoxy Resin, Epoxy Resin for Wood, Epoxy Resin Floor Coating, Polyurethane Floor Coating, Concrete Stain and Sealer, Outdoor Sports Court Floor Paint, Road Marking Paint, Water Based Floor Coating, Waterproof Polyurea Coating, etc. Our products have passed SGS, and RoHS environmental protection inspections.

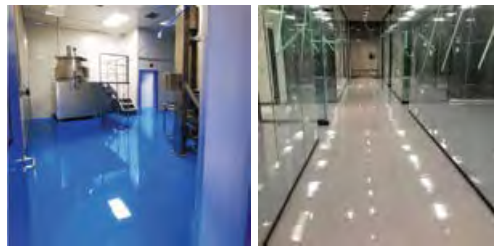

MAIN PRODUCTS

1- Metallic Epoxy Flooring: is a two-component, three-dimensional, self-leveling unique marble-looking flooring system. It is a specially formulated epoxy resin with pearlescent metallic pigment that looks like marble, which can create shiny, reflective, seamless, and highly attractive metallic surfaces on stained concrete floors.

METALLIC EPOXY FLOOR PAINT

METALLIC EPOXY GARAGE FLOOR

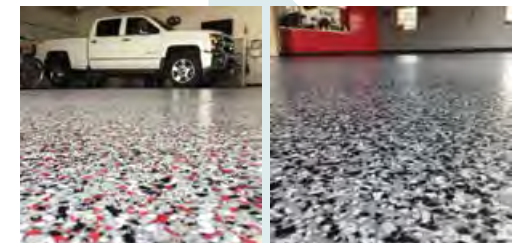

SLEF LEVELLING EPOXY FLOOR PAINT

CONCRETE EPOXY COATING

2 - Self-Levelling Epoxy Flooring: is a two-component, three-dimensional, self-leveling unique marble-looking flooring system. It is a specially formulated epoxy resin with pearlescent metallic pigment that looks like marble, which can create shiny, reflective, seamless, and highly attractive metallic surfaces on stained concrete floors.

3- Epoxy Flake Flooring System: is made up of dry paint flakes and combined with a colored base coat to create a textured multi-color finish. This concrete surface is extremely durable and hard-wearing and because of the textured finish, this flooring type has a high level of impact resistance and non-slip.

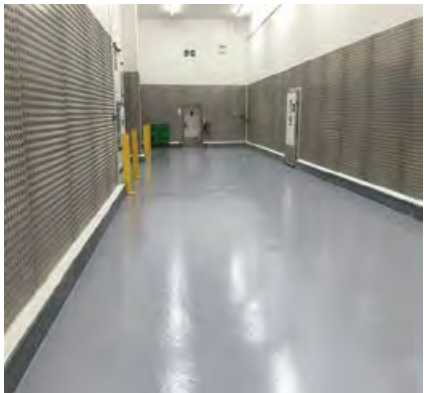

EPOXY MULTI FLAKE COATING

POLYASPARTIC FLOOR COATING

4 - Standard Epoxy Flooring:

Roller applied epoxy floor paint will consume much less product which also means a much lower total cost for the product, it tends to leave a slightly rougher texture also known as the orange peel can create a desired anti-slip effect to protect people from slipping. It is recommended for warehouses, factories, garages, etc.

ROLLER APPLIED EPOXY FLOOR PAINT

5 - Tabletop Epoxy Resin:

is a 2-component all-purpose self levelling high gloss finish epoxy resin to flood coat river tables, wood kitchen tables or any surface for a high level of see through transparency. It's a water clear coating, specially formulated to give a protective glass like finish on top.

6 - Deep Pour Epoxy Resin:

is a clear casting epoxy resin, specially formulated for deep pour casting, encapsulating, and modeling projects, pouring depth 5cm in a single pour. Excellent anti foam and air release property pourable epoxy resin, UV resistant formula.

7 - Outdoor Sport Court Flooring:

CS Elastic PU court flooring is a breathable resin organic compounds, non-toxic, non-slip, waterproof, sun-proof, brighter color than other similar products. It can be applied to both asphalt or cement's surface, suitable for outdoor and indoor, which has outstanding advantages in preventing the stadium from cracking, bulging, and aging.

8 - Countertops Epoxy Resin:

CS Countertops epoxy resin is a two component 100% solid super clean high quality resin product. Excellent anti-foam and air release properly pourable epoxy resin, UV resistant formula. Any number of effects, including marble and granite like - patterns, can be easily achieved.

10 - Glow in the dark

9 - Acrylic Epoxy Resin Art: CS Epoxy resin is a high gloss clear coat specifically designed for all the creative projects. Many artists are using an interesting art technique called acrylic pouring to create resin art, and then finishing it off with clear resin for that beautiful sheen.

11 - Metallic Color Pigments

MAIN PRODUCTS

Fuzhou HVBAN Mechanical Equipment Co., Ltd. is a national high-tech enterprise integrating design, R & D, production, sales, and service. It has nearly 20 years of experience in R & D and manufacturing of fluid equipment. It has passed ISO 9001:2015 quality management system certification, CE, EU safety certification and other international certification. The company is committed to building a high-tech enterprise "Created in China". At present, it has more than 40 effective patents for inventions and utility models at home and abroad, and the conversion rate of scientific and technological achievements is more than 90%. The products of our own brand are exported to more than 140 countries and regions in the world and have gradually become the first-class brand in the world fluid spraying machine industry.

Dextra

GROUP PLC

Dextra Group is now a world leading manufacturer of engineered steel and fiber-reinforced polymer construction products.

Dextra Group has developed through a long history, during which it encouraged those with an entrepreneurial spirit and constantly strived towards innovation and growth, leading to diversification.

Our two main activities are manufacturing and trading of engineered products for the construction and industrial sectors.

MACHINERIES

- GRINDING MACHINE
- VACUUM MACHINE
- POLISHING MACHINE
- FLOOR SCRUBBER MACHINE

MAIN PRODUCTS

1 - Natural Color Sand:

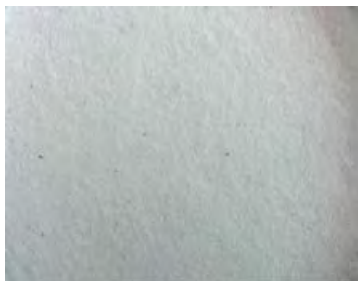

is made of marble and granite, it is manufactured by the process of choiceness, broken, powdered, classification, packaging, and so on.

They are widely used in architectural decoration, terrazzo aggregate, stone paint, building coating, etc. It can be used by the manufacturer of marble, floor tile, ceramic tile, decorative sanitary ware, and so on, it is glossy, smooth, and strong wear-resistant.

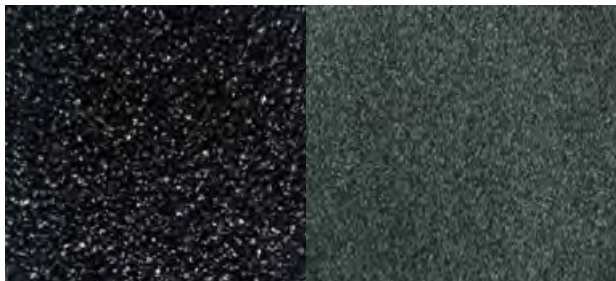

The natural color sand used in the production of new external stone paint and coating, reliefs, and other products has wear-resisting, waterproof, anti-corrosion, and non-toxic.

MAIN PRODUCTS

2 - Mica Flake / Mica Powder:

it can be used in decorating, painting, and coating. It can be applied to protecting layer of welding rods, conducting wires, and electric cables.

3 - Composite Rock Chips:

are materials for granite paint and coatings; it is composed of inorganic materials, high molecular polymer, non-ionic additives, and surfactant. The color and sizes are totally following the colors and sizes of the particles in the natural granite.

MAIN PRODUCTS

NATURAL COLORED CRUSHED MARBLE & GLASS FOR TERRAZO & OTHER APPLICATIONS

Crushed Marble Chips

PU RESIN FOR GRC MOLDING

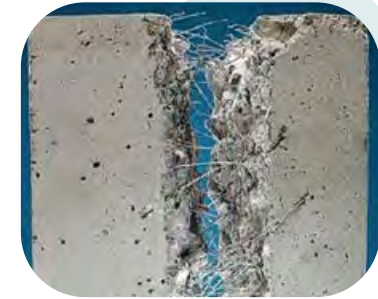

Polyurethane resins consist of soft and hard segments and have excellent elasticity and toughness. They are used for durable high gloss coatings like in cars, industrial applications, floorings, wood coatings as well as PU resins are used to modify alkyd resins, which are used in paints, enamels, and varnishes. PU resins are used for manufacturing moldable thermosetting plastics Dextra Group has developed through a long history, during which it encouraged those with an entrepreneurial spirit and constantly strived towards innovation and growth, leading to diversification. Our two main activities are manufacturing and trading of engineered products for the construction and industrial sectors.

MAIN PRODUCTS

CONCRETE & MORTAR REINFORCEMENT PP FIBER

Polypropylene fibers have been applied for reinforcement of cement mortars and concrete for many years. The fibers restrict crack propagation and positively affect several concrete parameters. To improve the adhesion of polypropylene to cement matrix, geometrically deformed or modified fibers are commonly used.
